

CONCURSO DE IDEAS PARA EL SOLAR DEL CUARTEL DE CABALLERIA DE BURGOS

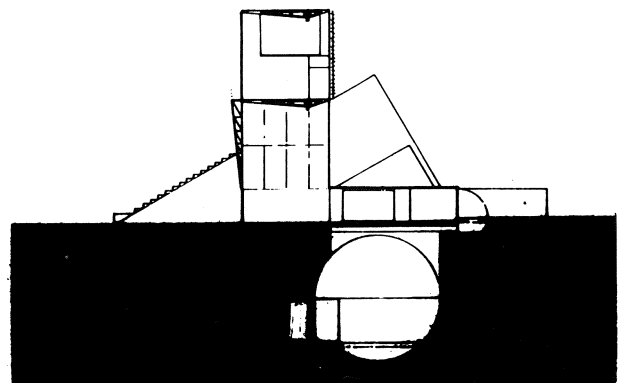

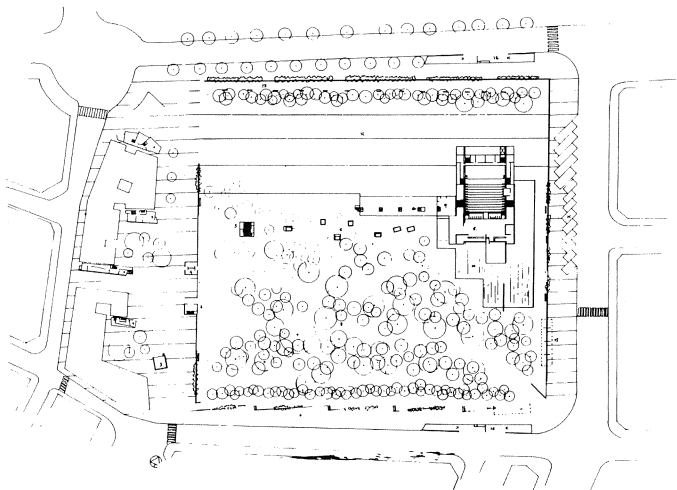

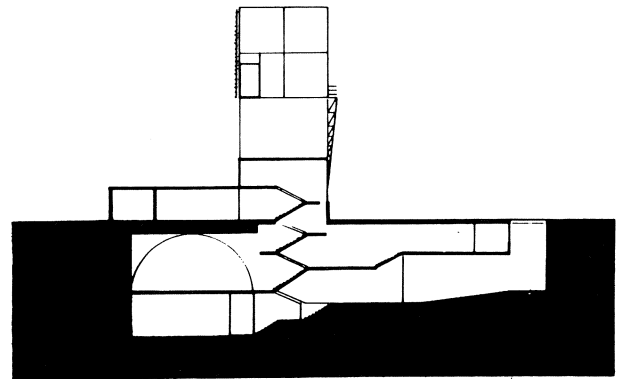

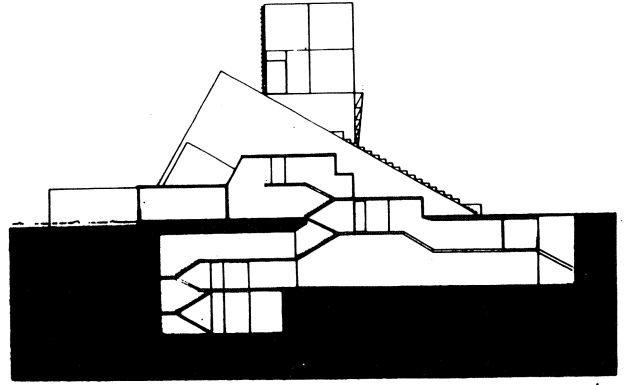

Planteado un concurso de arquitectura en la ciudad de Burgos para resolver un solar anteriormente ocupado por un cuartel de Caballería, con un programa complejo que incluye viviendas, oficinas, centros culturales..., además del espacio público a incorporar a la trama urbana de la ciudad, se organizaron durante el curso 89-90 de Proyectos III de la E.T.S.A., y dirigidos por el profesor de la asignatura don Alberto Noguero, varios grupos que concursaron con el resultado de un tercer premio y dos menciones.

A continuación presentamos los ocho trabajos que participaron en esta convocatoria, en los que, además del valor en sí de las propuestas, resulta interesante la evidencia de un hijo conductor común que preside la mayor parte de estos trabajos, haciendo escuela, en el sentido más arquitectónico de la expresión.
