

A History of the English Language Online Course
Alejandro Alcaraz Sintes
Universidad de Jaén

Abstract

This paper is a general illustrated description of the contents and structure of the *History of the English Language (HEL) Online Course* designed by the author for the students enrolled in *Historia de la Lengua Inglesa* at the University of Jaén (an obligatory year-long course in English Philology curricula in Spain). The purpose of the *HEL Online Course* is to offer students a very extensive range of both theory and practice-related materials, as well as other useful resources, such as a blog-page and a *Google*-powered search page. Also, the website of the *HEL Online Course* is complemented by materials available on the university's virtual e-learning platform. The website was launched at the beginning of the academic year 2007-2008 and is currently being used by 2008-2009 students.

1. Introduction

The main purpose of presenting the *HEL Online Course* at the 2007 AEDEAN Conference was to demonstrate how the discipline can be taught and learned by taking advantage of the immense potential offered by computers and the internet, particularly at a time when teaching methods will have to adjust to the new learner-centred requirements about to be implemented in the European Higher Education Area. A second but no less important reason was to publicize the *Course* among colleagues interested in what may be termed *computer-assisted instruction* of the 'History of English'.

Different file-types are used for different kinds of activities in the teaching/learning process. For example, *FrontPage*, *Word* and *Acrobat* files are well suited for providing information for autonomous study (theory and exercises); *PowerPoint* presentations are suitable for class

explanations; *Excel* spreadsheets prove valuable for student's work, e.g. inputting dialectal differences and phonological changes and reordering them according to periods or features; *Access* databases are used for dictionaries and glossaries. Often the same content is exploited with a wide variety of formats and activities, designed to make the learning process easier and appealing, and yet thorough and methodical.

The whole website and individual webpages were designed with Microsoft FrontPage. Javascript tooltips (*boxover*)¹ (see Figure 14) and plug-ins (*Snap Shots*TM)² (see Figure 15) have been used to enhance hypertextuality: mouse-over/-click inboxes containing translations, commentaries and snaps of external webpages.

The *HEL Online Course* must be viewed and assessed against the background of other similar websites, particularly in the United States and Canada. However, most of them are devoted to only one period of the history of the English, either Old or Middle English. See Alcaraz Sintés (2002), Martín Arista (1999) and the Resource sections in the Course for further references.

For the time being access to the *HEL Online Course* is restricted to University of Jaén students, but access will become unrestricted (at http://www4.ujaen.es/~aalcaraz/History_English_Language/index.htm) and the Course will be published in CD-ROM format once it is fully completed and revised, though full exploitation will require it to be run on Internet-connected computers.

2. Description of the *HEL Online Course*

The main blocks of the *HEL Online Course* are accessed by means of a horizontal menu bar at the top of the homepage. This menu bar³ contains the following items: **General** (Course Information), **Historical Linguistics** (Introduction), **Old English**, **Middle English**, (Early) **Modern English**, **Word-Index** (Glossary), **Blog**,

¹ *Boxover* is available at <http://boxover.swazz.org> <07/10/08>.

² *Snap Shots*TM is available at <http://www.snap.com/> <07/10/08>.

³ This and other menu bars in the *HEL Online Course* website were created with the JavaScript application *AllWebsMenu PRO*, available at <http://www.likno.com> <07/10/08>.

Site Search, Research, Site map. This horizontal menu is visible in all the webpages of the site. See Figure 1.

Figure 1. Main blocks on the website's homepage

Some of the buttons in the top menu ([Word Index](#), [Blog](#), [Site Search](#), [Site Map](#)) are direct links to *html* files that are displayed either in a central frame or else in a new browser window or tab. Other buttons ([General](#), [Hist. Ling.](#), [OE](#), [ME](#), [ModE](#)) open up new vertical menus on the left of the homepage. Each of these vertical menus is further subdivided into more specific submenus. The vast majority of the documents linked to from the buttons have been belong to the *HEL Online Course* itself, but some are external.

General menu bar

The **General** menu bar contains buttons for the **Syllabus** (a *pdf* file with the official course syllabus), **Dictionaries**, **Bibliography**, **Internet Resources** and **Exams Models**. On clicking the **Dictionaries** button, a cascading submenu opens containing buttons for dictionaries of *Old English*, *Middle English*, *Historical*, *Etymological* and *Latin*, plus a button for *Thesauri*. The references given in **Dictionaries** are both printed and electronic works. Figure 3 shows dictionaries of Old English available on the Internet. The **Bibliography** button is further subdivided into *Historical Linguistics and Language Change*, *External History*, *Old English*, *Middle English*, *General* and *Anthologies*. The **Internet** button contains links to online resources for *Indo-European*, *Manuscripts* and *Others* (that is, other websites relevant for a HEL Course).

Figure 2. General > Dictionaries > Old English > Internet

Historical Linguistics

The **Historical Linguistics** left menu displays the following buttons: **Why study English Historical Linguistics?** (a *pdf* document), **Where do PDE irregularities come from?** (a *PowerPoint* presentation), **Further reading**, **Terminology**, **Germanic Languages** and **External History**.

Old English

The **Old English** left menu has the following buttons: **External History**, **Crash Course**, **Phonology**, **Morphology**, **Syntax**, **Vocabulary**, **Texts** and **Timelines**. The **External History** button, in turn, opens into a submenu with buttons for *Anglo-Saxon Period*, *Medieval Culture*, *Runes*, *Curiosities*, *People* and *Others*. The **Crash Course** is made up of ten units. Autonomous learning is made easier by means of *boxover* and *Snap Shots™* plug-ins; see Figure 14 and Figure 15, respectively. **Phonology** splits into *Terminology*, *Sound Changes*, *Vowels* and *Consonants*. *Terminology* is a *ppt* document illustrating the basic terminology needed to explain sound changes. *Sound changes* is another *ppt* presentation summarizing the basic types of sound changes. *Vowels* contains buttons linking to *html* pages describing the evolution of vowels from Indo-European, through Northwest Germanic and Anglo-Frisian, to Old English. *Consonants* is divided into Grimm's Law,

Verner's Law, Geminations (all three of them subdivided into Description, Exercises and Solutions), Palatal Consonants and Diphthongizations, and (Consonantal) Simplifications. See Figure 5 to Figure 5.

Figure 3. The Old English > Phonology cascading menus

Figure 4. Verner's Law. *Exercises* webpage (Central frame)

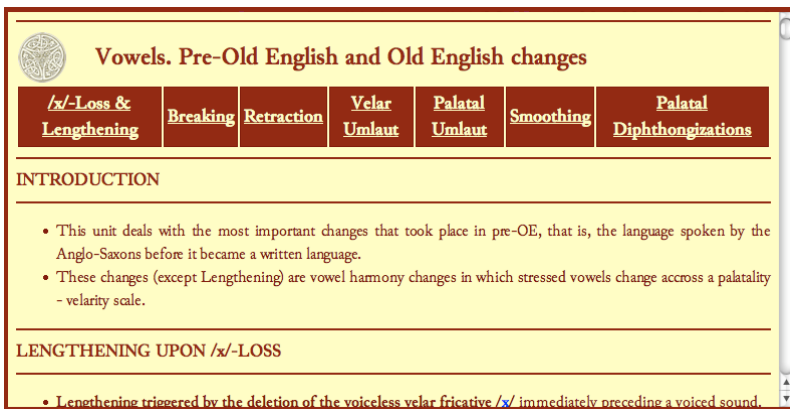

Phonology. Consonants. Verner's Law. Exercises

Exercise 1

- The following are the main part of some Old English whose consonant alternations were explained by Verner.
- Fill in the missing parts.

Verb class	Infinitive	Preterite 1	Preterite 2	Past Participle	Modern English
1	liþan	lā_	lidon	li_en	"to travel"
1	sni_an	snaþ	sni_on	sniiden	"to kill"
1	scriþan	scrā_	scridon	scri_en	"to go"
2	sēo_an	sea_	sudon	soden	"to see/be"
2	čēosan	čas	cu_on	coren	"to choose"
2	lēosan	lea_	luron	lo_en	"to loose"

Figure 5. Old English Sound Changes webpage (Central frame)

The OE **Morphology** button contains a submenu for *Nouns*, *Pronouns*, *Adjectives*, *Adverbs*, *Verbs* and *Numerals*. Clicking of any of these buttons opens up in the central frame the relevant webpage, which gives not only a synchronic description of Old English, but also diachronic explanations of the forms, going as far back as Indo-European when necessary. All the discipline-related terms used in the explanations are links to the relevant section in the *HEL Online Course* website. For example, in Figure 6, a snapshot of the section on OE *ja*-stemmed nouns in the **Old English** > **Morphology** > *Nouns* page, the terms *gemination* and *Palatal Mutation* are underlined and link to the relevant page or to an anchored location in the webpage (**Old English** > **Phonology** > *Consonants* > Gemination > Description, and ...> *Vowels* > Pre-Old English > Palatal Umlaut, respectively; see Figure 7 for the latter). The *Verbs* button opens a new submenu containing OE Verbs, a full synchronic and diachronic description of OE verbs, and three exercises⁴: Identification, Sound Changes and Crosswords. See Figure 8 to Figure 10.

⁴ The software used for these and other exercises in the *HEL Online Course* is *Hot Potatoes* Version 6.2., available at <http://hotpot.uvic.ca> <07/10/08>.

Figure 6. OE *ja*-stemmed nouns (Central frame)

◦ *ja*-stem nouns (<IE */iə/).

- Reason:
 - The thematic vowel */a/ was preceded by a yod, */j/.
 - Heavy root syllable (VVC or VCC): the original */j/ > */i/ > /e/, which is preserved in the nom and acc sg: Gmc *and-j-a- > OE *ende* ("end").
 - Light root syllable (VC):
 - a) this /e/ was preserved in early OE in the nom and acc plural (immediately before the inflection), but was later lost;
 - b) it produced **gemination** of the consonant: Masc: Gmc */sagjaz/ > OE *secġ*, *secġ(e)as*, *secġ(as)*, *secġ(i)um*, ("man"); Neut: Gmc */kunjom/ > OE *cynn* ("race, kin").
 - Notice that in all cases, the /j/ triggered **Palatal Mutation** and was lost subsequently.
- Other members of the class:
 - Masculine: *wecġ* ("wedge"), *hyll* ("hill"); *here* ("army"); *hwæte* ("wheat"), *lāce* ("physician, leech"), *bōcere* ("scribe"), *leornere* ("learner"); *ende* ("end"), *hierde* ("shepherd").
 - Neuter: *wite* ("punishment"), *style* ("steel"), *ġetimbre* ("building"), *ġeþeode* ("language"); *cynn*

Figure 7. Palatal Umlaut (Central frame)

PALATAL UMLAUT

1. Description

- Summary: Velar Vowel + Consonant + */i/ or */j/ (but not */ji/) > Palatal Vowel + Consonant.
- Other terms: *iŷ*-Umlaut or Palatal Mutation.
- Type of change: Regressive adjacent assimilation.
- Period: Pre-OE: 6th-7th cc. After the invasions, but before the earliest OE written records.
- Old English dialect affected: All.
- Triggering sounds in the following syllable: Syllabic */i/ or non-syllabic */j/ in the following syllable, normally an inflectional or a derivational suffix. These triggers had already disappeared by the time of the earliest OE written records.
- Inputted vowels: Short and long velar vowels: /u/, /u:/, /o/, /o:/ and /a/. There may be one or two intervening consonants between the trigger and the input.
- Nature of the change: The back vowel turns into a front vowel, i.e., the whole vocalic space is affected.
 - */u/, */u:/ > /i/, /i:/ = "y, ŷ" > Late West Saxon /y/, /i:/
 - */o/, */o:/ > /œ/, /œ:/ > /e/, /e:/ = "ē"

Figure 8. Exercise 1 on Strong Verbs: Identification

2. If you find a verb with this structure "grade + nasal/liquid ", what Class is it?

A. Class 3

B. Class 7

C. Class 5

D. Class 2

E. Class 4

F. Class 6

G. Class 1

Sorry! Try again.

Figure 9. Exercise 2 on Strong Verbs: Relevant sound changes

Answer the questions.

2 / 19

What change accounts for the diphthong "eo", as in "feohtan" and "beorgan"?

A. Breaking

B. i/j Umlaut (Palatal Mutation)

C. Pseudo-diphthongization

D. Influence of a nasal

Figure 10. Exercise 3 on Strong Verbs: Crosswords puzzle

The OE **Syntax** button contains a submenu for *Word Order*, *Typical Structures*, *Coordination*, *Subordination*, and two *exercises* on syntactic analysis. These two exercises are multiple-choice tests on an excerpt from Alfred's *Letter to Wærferth* (Figure 11) and on the biblical story of Abraham and Isaac (Figure 12).

Figure 11. Syntax exercise 1: Alfred's *Letter to Wærferth*

Figure 12. Syntax exercise 2: “Abraham and Isaac”

Abraham and Isaac. Syntax: Subordination

Answer the questions.

- GOD wolde þa fandian Abrahames gehyrsumnyssa, and clypode hys naman.
- and cwæð him ðus to: Nym ðinne ancennedan sunu Isaac, **þe ðu lufast**, and far to þam lande Visionis hraðe, and geofra hyne þær uppan anre dune.
- Abraham ða aras on þære ylcan nihte and ferde mid twam cnapum to þam fyrlenum lande, and Isaac samod, on assum ridende.
- Pa on ðone ðriddan dæg, **þa hi ða dune gesawon**, ðær ðær hi to sceoldon to ofsleane Isaac.

Previous 2 / 13 Next Show all

Line 4
What type of subordinate clause is "**þa hi ða dune gesawon**"?

A. Relative Clause

B. Adverbial Time Clause

The **Texts** button opens the submenus for each of the texts studied during the course; see Figure 13. The texts are presented in a variety of formats: some are *html* pages designed with *Hot Potatoes* (see note 4) and include links to the locations where digitalized images of the manuscript are available. This allows the students to compare the transcribed text and the original manuscript. Other files are *pdf* documents designed for printing and home study. Self-study is encouraged by means of *boxover* commentaries on the grammar or style of a particular clause or word; see Figure 14.

The **Resources** button subdivides into *Phonology*, *Morphology*, *Vocabulary*, *Online Courses & Software*, *Texts*, *Computer Fonts* and *Old English Exam Model*. Each of these pages contain a comprehensive list of links to other websites, webpages, online software, online, courses... Again, each link is enhanced by a *Snap Shots™* hyperlink in the shape of bubble. Placing the mouse over the hyperlink will open a preview of the linked webpages, without having to open a new tab or browser session; see Figure 15.

Middle English

The **Middle English** left menu contains cascading submenus similar to those of the Old English menu: **External History**, **Phonology** (*Vowel, Consonants, Spelling*), **Morphology** (*Nouns, Adjectives, Verbs*), **Syntax** (*Coordination, Subordination, Cases, Impersonal Constructions, the Passive Voice, Negation and Interrogatives*), **Dialects** (*Diversity, Features by dialect*), **Vocabulary** (*Foreign borrowings, Dictionaries*), **Texts** (*Transition: The Peterborough Chronicle, Dialects: Dialectal features in Chaucer’s “The Reeve’s Tale”, Northern: The Cursor Mundi, East Midland: The Bestiary (“Cethegrande”), West Midland: Sir Gawain and the Green Knight, Southern: The Fox and the Wolf, and Kentish: Remorse of Conscience), **Web Resources** and **Bibliography**. Again, different types of file formats are used in different sections and for different purposes: *html, ppt, pdf*... Also, the exploitation of the texts is varied, the aim being not only to translate the texts, but also to help students study the evolution of English through the extant forms and structures found in ME texts. For example, the excerpt from *The Bestiary* contains the translation and questions on the grammar and vocabulary found in specific sections or lines; see Figure 17.*

Figure 17. ME > Texts > East Midland > “Cethegrande”: text, translation and questions

<p>7. ȝis fis ȝat is vnride, 8. ȝanne him hungreȝ he gapeȝ wide;</p>	<p>Translation</p>	<p>What type of construction is him hungreȝ? What pronouns are used to refer to the whale here and in the rest of the text? Explain the usage. What is the phonetic value of the vowel in gapeȝ? EMid ME has -eþ as 3rd p. sg. pres. ind., e.g., hungreȝ. Find other verbs with the same morpheme.</p>
<p>9. vt of his ȝrote it smit an onde, 10. ȝe swetteste ȝing ȝat is o londe;</p>	<p>Translation</p>	<p>What is the phonetic value of the vowel in ȝrote? What is the phonetic value of the vowel in swetteste? And that of swete? Why do the verbs smit and flet (line 4) lack the 3rd p. sg. pres. ind. morpheme -eþ, used with other verbs (e.g. gapeȝ, hungreȝ in line 8)?</p>
		<p>Write the phonetic evolution of dragen from OE to ME. Write the phonetic evolution of fagen from OE to ME. Why has the rhyme not survived: PDE <i>draw</i> /dro:/ vs. <i>fain</i></p>

Modern English

The **Modern English** left menu follows the same general sections and links to different types of documents. Figure 18 shows the cascading submenus for **Phonology** and Figure 19 shows a small section of an *Excel* table displaying vowels that underwent certain phonetic changes in Middle English and Modern English.

Figure 18. Modern English > Phonology cascading submenus

Word Index

The **Word Index** button on the top menu bar opens an alphabetically arranged list of terms belonging to the discipline. Each term is a hyperlink to the relevant webpage or to a specific section of a webpage. See Figure 20.

Figure 20. Word Index (terminological glossary): Beginning of A

HEL Blog

Another major section is the **HEL Blog** page designed to encourage students to contribute to the *HEL* Course. This is an important part the course, since the final grades awarded depend not only on exam results, but also on student participation. Blogs prove to be an easy and objective way to evaluate the students' active participation. Both students and the instructor can post messages (see Figure 21) and subscribe through RSS feeds (see Figure 22). The Blog's homepage contains links to the other major components of the *HEL* Course (see Figure 23) and to other *HEL* websites and blogs, a *Snap ShotsTM* link to the *Toronto Dictionary of Old English* "Word of the Week", and RSS feeds from *Intute* (The Arts and Humanities English Gateway), which can be also be viewed in new browser tabs or windows or in *Snap ShotsTM*-generated mouse-over inboxes.
