The authors regret < Where it says Table 4, replace by Table 5. I include the paragraph to contextualize (it is the second paragraph after Figure 2).

The results show that the thirteen hypotheses we formulated (Table 5) were all supported by the proposed model. In addition to the standardized regression coefficients ( $\beta$ ), Table 5 shows the associated T statistics and the significance levels (p-value) which allowed us to establish whether the hypotheses were supported by the proposed model. >

The authors would like to apologise for any inconvenience caused.
