

## ***Supplementary Material***

### **1 Supplementary Data**

**Supplementary Table 1.** Correlation between Insulin-like growth factor (IGF) proteins and inflammatory markers with age in all groups.

**Supplementary Table 2.** Insulin-like growth factor (IGF) and inflammatory markers differences in male and female in all groups.

**Supplementary Table 3.** Correlation among Insulin-like growth factor (IGF) proteins in all groups.

**Supplementary Table 4.** Correlation among inflammatory markers in all groups.

**Supplementary Table 5.** Correlation between differences and percentage reductions after pharmacological treatment in the levels of Insulin-like growth factor (IGF) proteins and inflammatory markers with the Young Mania Rating Scale (YMRS) differences and percentage reductions.

### **2 Supplementary Figures and Tables**

Proteins	Groups	Age (years)		Proteins	Groups	Age (years)
